腰骶胸部矫形器

- 1. SIZE ADJUSTMENT**
 A. To adjust the size of the brace, peel up the inside end of each side panel.
 B. Adjust as necessary to achieve a proper fit and reattach.
 C. Brace sizes follow closely to standard pants sizes. Size ranges are only guidelines.
 NOTE: Once the brace is applied, the sides of the brace may require further adjustment to achieve a snug fit without too much overlap at the front of the brace.

SIZING GUIDE		
Size	Circumference	
1	28 in	71 cm
2	37 in	94 cm
3	45 in	114 cm
4	54 in	137 cm

- 2. PREPARATION**
 Place the pull tabs 2 inches (5 cm) from the plastic in the back of the brace. Pull the ends of the brace away from each other ensuring that the brace is fully extended.

- 3. APPLICATION**
 A. Apply the fully extended brace making sure the back panel is centered and low on the back.
 B. Apply the brace tightly, with the right side overlapping the left. When applied properly, both the upper and lower edge of the brace should be snug. If they are not, reapply the brace. If needed, angle the ends to insure a snug fit at both the upper and lower edges.
 NOTE: For certain patients, the ends must be steeply angled.

- 4. TIGHTENING**
 A. Slip your thumbs through the holes in the pull tabs. Pull away from your body.
 B. The left pull tab controls lower compression and the right pull tab controls the upper compression. Adjust the compression as needed.
 C. When tightened, secure the pull tabs to the loop in front of the brace.

- 5. ADJUSTMENT**
 A. Adjust the upper and/or lower compression by loosening or tightening the pull tabs as needed.
 B. When patient is seated, slightly loosening the upper portion may be beneficial.

- 6. STRAP ADJUSTMENT**
 A. Properly fit shoulder straps.
 B. Pull and tighten the shoulder straps.

- 7. PANEL REMOVAL**
 If necessary, remove back panel after disengaging hook and loop attachment between back panel and belt.

INTENDED USE
 To provide motion restriction and stability of the Thoracic-lumbar-sacral spine

INDICATIONS
 Postoperative support, Degenerative disc disease, Bulging or herniated disc, Fracture management, Spondylolysis, Spondylolisthesis, Spinal stenosis, Kyphosis, Spondylitis (Osteoarthritis/Degenerative Joint Disease)

CONTRAINDICATIONS
 Hypersensitivity or allergies to any of the materials from which the brace is made. Swelling of the lymphatic tissue caused by circulatory disorders. Patients who are not allowed to wear a brace according to medical instructions.

PRECAUTIONS
READ INSTRUCTIONS BEFORE USE. Proper training in the use of this device should take place before it is applied. These directions are guidelines only and are not offered as medical recommendations. If you suffer from a serious medical condition, we strongly suggest that you consult with a licensed health care professional before using this product. Proper fitting is required for this product to be effective. Under some circumstances, this product may be prescribed by a physician. Please see the limited warranty for further information.
